

# Training at Kenema Government Hospital

05 Dec 2024 | News | 2 min read | Admin

The staff at Kenema Government Hospital, one of the identified sites for capacity development under Track A of the ARC-WA project, underwent training on 'clinical trial fundamentals' .

The training was led by experienced clinicians and clinical trialist from IVI and MMARCR. The team at KGH are getting ready to be part of the C111 Lassa fever vaccine Phase 2b trial, currently under development.
